

GS-718 HAWK EYE

7 X 18 mm Ultra-light weight golf scope

The compact one-hand scope with 7x magnification and 18mm objective lens is the perfect accessory for any golf enthusiast!

Accurate distance-to-pin measurement makes club selection easier and is sure to take strokes off your score.

Directions: View pin from ball lie by placing bottom of pin at the base of the distance scale. Read yards/meters from the scale opposite top of pin. This reading is the distance your ball is away from the pin.

Note: Your Golf Scope is permanently in focus at all distances from a minimum focus point to infinity, just lift the scope to your eyes and enjoy the view.

How to care for your Golf Scope:

- A. When wiping the lens, use the lens cloth that comes with the scope, or a soft lintless cloth.
- B. To remove any remaining dirt or smudges, add one or two drops of isopropyl alcohol to the cloth.
- C. Store your Golf Scope in a moist-free area.
- D. Very important: Never attempt to clean your Golf Scope internally or try to take it apart.

See through the golf scope

Caution:

Viewing the sun can cause permanent eye damage. Do not view the sun with this scope or with the naked eye.
