

ZM-825 MonoZoom
8-16x25mm Zoom Monocular

Congratulations!...

On selecting your new **Carson ZM-825 MonoZoom** Compact Zoom Monocular. With reasonable care, your monocular will provide you with years of enjoyment. In order to achieve optimum performance, please read the instructions carefully on the proper use and care of your monocular.

Instructions for Care...

Like any fine optical instrument, your Close-up monocular should be given sensible care. Do not drop or violently jar your monocular. This may cause the internal optical components of your monocular to become misaligned and reduce the quality of the image. Do not expose the monocular to excessive moisture.

Cleaning...

Cleaning must be done safely and carefully to avoid scratching the lenses and permanently damaging your monocular. Safe cleaning can be accomplished using a Carson LensPen lens-cleaning device. If you do not own a Carson LensPen, please follow the procedures below....

Blow away any dust or debris on the lens (or use a soft lens brush). To remove dirt, grease or fingerprints, clean with a soft cotton cloth rubbing in a circular motion. Use of a coarse cloth or unnecessary rubbing may scratch the lens surface and eventually cause permanent damage. For a more thorough cleaning, photographic type lens cleaning fluid may be used. Always apply the fluid to the cleaning cloth, never directly on the lens.

IMPORTANT: never attempt to clean your monocular internally or try to take it apart.

Focusing your Monocular...

The ZM-825 magnifying power ranges from 8x to 16x magnification. To zoom in or out simply twist the eyepiece to reach the desired magnification.

Focusing: To focus the MonoZoom, twist the non-slip rubber focus control located below the eyepiece until the viewing subject is clear and sharp. It may be necessary to re-focus after you adjust the magnification.

The MonoZoom comes complete with soft pouch, wrist strap, eyecups and lens cloth.

Caution!

Viewing the sun can cause permanent eye damage.

Do not view the sun with this monocular or even with the naked eye.
